

Dear Mr. Mustermann,

Despite the summer break, Hilscher GmbH was active to further advance product development such as the implementation of additional protocols for the powerful gateway netTAP100. The next date where you can see Hilscher products and innovations will be at the Motek - International Trade Fair for Assembly and Handling Technology (21st - 24th September 2009) – in Stuttgart, Germany. We are looking forward to meeting you at the Hilscher booth in hall 9 / stand 9130.

Hilscher netIC – Communication module in DIL-32-format for Fieldbus and Real-Time-Ethernet

Communication modules with serial host- or shift register interface are well established on the market and are preferred for low-cost field devices like barcode readers or basic I/O blocks.

Hilscher netIC is a complete single-chip solution in DIL-32-format providing Fieldbus or Real-Time-Ethernet functionality. Access to the Host-CPU is via the well-known Modbus RTU protocol. Besides you can easily collect up to 16 Byte I/O data via shift registers.

Now available:

- netIC for Fieldbus and connection with fiber optic cable.
- Support of new protocols CompoNet and CC-LINK 2.0

Highlights

- **Significant less development and maintenance costs** compared to in-house development.
- **Reduce storage costs**, one single hardware for all Real-Time Ethernet protocols.
- **Minimal integration effort** due to well-known Modbus RTU protocol to the Host-CPU.
- **Fast & easy way to transfer your I/O data**: up to 16 Byte I/O data can be connected directly via shift register.
- **Freedom of choice**, all major Fieldbus and Real-Time-Ethernet protocols are supported at the same price.
- **Excellent price-performance ratio** for low-cost field devices.
